PROFILE

AI/ML Engineer who loves turning messy data and manual workflows into smart, automated systems that actually save people time. Skilled in Python, Data Analytics, and building end-to-end AI tools from AI agents and predictive models to RAG-based assistants that make knowledge retrieval effortless.
I've built solutions that help agencies track projects automatically, doctors manage patients seamlessly, and teams access information faster. My strength lies in connecting the dots between business needs and machine learning, translating complex data into clear, actionable outcomes. I'm passionate about using AI not as a buzzword, but as a tool to simplify work, amplify impact, and move businesses forward.

WORK EXPERIENCE:

Software & Marketing Project Executive | Akhand Solutions, Pune
Feb 2024 – Jun 2025

- **Optimized marketing funnels** with data-driven experiments, achieving a **300% uplift in conversions** through A/B testing.
- **Developed lead generation systems** capturing **100+ qualified leads/month** (20–30% close rate), using automated prospect scraping and targeting workflows.
- **Built client-facing products** including:
  - **2 MERN applications** for slot booking & digital tool management.
  - **2 Python applications** (Doctor's Patient Management System (Desktop application) & Project/Task Automation tool using Google Apps Script).
- **Deployed a RAG-based Telegram chatbot** (LLaMA API) for internal knowledge retrieval from company SOPs, making it easier for employees to access process information.
- **Automated workflows** (n8n, Google Apps Script) to streamline reporting, reminders, and CRM updates saving **20+ hours/month**.
- Collaborated with cross-functional teams to **deliver product prototypes** and **mentored a team of 3 engineers** in building automation-first solutions.

Freelance – AI & Automation Projects | Remote
Jul 2023 – Present

- Partnered with 5+ small businesses, doctors, and agencies to design automation systems, AI agents, and data apps tailored to their operations.
- Delivered 50+ qualified leads/month for clients via automation-driven lead gen campaigns.
- Built Python-based automation workflows (Selenium, BeautifulSoup, FastAPI, Requests) to reduce manual operations and improve efficiency.

KEY PROJECTS:

1. Project Tracker Automation – BameeTech (Client Project)

- Automated task submissions using Google Forms, with instant team notifications via email.
- Eliminated manual task assignment, streamlining project tracking for a digital marketing agency.

2. RAG AI Knowledge Assistant – Akhand Solutions & BameeTech (Client Project)

- Developed a **Retrieval-Augmented Generation (RAG)** AI agent trained on company SOPs.
- Helped employees quickly retrieve answers, reducing repetitive queries and boosting productivity.

3. NLP Query Engine for Employee Data (NLP Project)

- Developed a natural language query engine enabling users to fetch employee insights from databases and documents without SQL knowledge.
- Built with FastAPI, React, and FAISS, integrating LLMs for Natural Language to SQL translation, hybrid search, and dynamic schema adaptation.

4. Customer Analytics & Segmentation (ML Projects)

- Built supervised ML models for **churn prediction** (Random Forest, XGBoost) and customer segmentation using clustering.
- Delivered actionable insights to improve retention and personalized targeting strategies.

5. Advanced Data Analytics – Zomato Dataset (Practice Project)

- Analyzed **10,000+ restaurant records** using Pandas, Matplotlib, and Seaborn.
- Discovered **cuisine trends, rating patterns, and city-level performance drivers**, delivering insights for pricing and customer targeting strategies.

TECHNICAL SKILLS:

- **Programming & Automation:** Python (Advanced), Java, JavaScript, SQL, HTML, CSS, React, Selenium, BeautifulSoup, Requests, FastAPI, Flask
- **AI/ML Frameworks:** Scikit-learn, TensorFlow, PyTorch, Keras, XGBoost, LightGBM, CatBoost, Hugging Face, LangChain
- **Data Analytics & Visualization:** Pandas, NumPy, Power BI, Tableau, Looker Studio, Matplotlib, Seaborn, Plotly
- **AI Tools:** Google AI Studio, Hugging Face Hub, Groq, Ollama, Lovable, Prompt Engineering
- **Deployment & Tools:** Docker, Git/GitHub, Streamlit, Anaconda, Postman, Vercel, n8n, Make.com, Google Apps Script
- **Databases:** MySQL, MongoDB
- **Core Concepts:** Statistics, Probability, Hypothesis Testing, Linear Algebra, Optimization, Gradient Descent, Feature Selection, Regression & Classification
- **Other Applied Skills:** Workflow Automation, EDA, Feature Engineering, Model Deployment, AI Agents, Web Development, UI/UX Design

---

EDUCATION:

Masters in Computer Application (MCA) | 2023 – 2025
Bachelor of Commerce – Business Administration | 2020 – 2023
(Developed strong business foundation complementing technical expertise in AI & ML)

Certifications:

- IBM Data Analyst Specialization
- Full Stack Data Science – NareshIT
- Business Intelligence & Business Analysis – Udemy
- SQL & MySQL for Business Analysis – Udemy
- Full Stack Java – The Kiran Academy

Leadership & Achievements:

- Built Personal Brand on Linkedin: 400K+ impressions & 5K+ followers by sharing AI/ML insights.
- Freelance Social Media Marketer & Google Automation (5+ years).
- Runner-up, College Chess Competition.
